EDUCATION

Politecnico di Milano & Kungliga Tekniska högskolan (KTH) BSc and MSc in Computer Science Engineering, double degree in Data Science	Sept 2021 – Active
Liceo Classico Umberto I (Ragusa) Classical High School	Sept 2016 – June 2021

TECHNICAL COMPETENCIES

- **Languages:** C, C++, Python, Java. **Web development:** HTML, CSS, JavaScript, PHP. **HW design:** VHDL, Verilog.
- **Databases management:** MySQL, PostgreSQL. **Data Processing:** Spark, Numpy, Pandas.
- **ML libraries:** Scikit-learn, Keras, TensorFlow. **Visualization:** Seaborn, Matplotlib.
- **Collaboration:** Slack, GitHub, Google Colab, Notion.

EXPERIENCE

Rilemo	Nov 2026 – Active
• Designed and built an end-to-end AI pipeline for microwave brain radar imaging to optimize early-stage cerebral strokes' detection, localization and classification accuracy. The system combined learned background estimation with classical beamforming techniques and tomographic reconstruction targeting sub-second inference.	
EIT Digital Foundation	Sept 2025 – Active
• As part of the continent's largest open innovation ecosystem I gained business and entrepreneurial competencies, complemented by technical knowledge, enabling the development and implementation of innovative market solutions.	
Novel, Emerging Computing System Technologies Laboratory	Sept 2024 – Active
• By having access to Polimi's labs I gained experience in both research and education by mastering scientific writing, tackling challenges in hackathons and broadening my experience in areas such as public speaking and critical thinking.	

PROJECTS

- Sense_Pedal_Board**
- Developed a wireless wearable device that captures musicians' foot gestures, enabling seamless changes to the sound of their instruments while playing. Tackled the challenge of hosting a complex ML model on resource-constrained devices.
 - Presented project results on the Casa Sanremo Invest stage during the Festival di Sanremo 2025.

ATale

- Developed a mobile application that leverages facial and object recognition to help Alzheimer's patients strengthen connections to memories at risk of fading away.
- Led a team made of students from various backgrounds, harmonizing their skills to fully realize the project's multidisciplinary potential.

SICID logs

- Conducted a study on the impact of data mining and deep learning on judicial efficiency, focusing on case disposition times, by analyzing log consistency within SICID, the IT platform used for managing civil litigation cases in Italy.

INTERNATIONAL EXPERIENCES AND LANGUAGES

KTH Royal Institute of Technology Data science double degree student in Stockholm, Sweden.	Sept 2026-Sept 2027
Prirodoslovna Gimnazija Rudera Boškovića Erasmus+ student in Osijek, Croatia. Explored ICT tools in traditional and distance learning.	Jan 2018 – Mar 2018
Languages Italian: native, English: Cambridge Certificate of Advanced English (C1).	

VOLUNTEERING

- **Avis blood donor:** Streamlined access to blood donation initiatives for the entire Polimi community, doubling participation through the development of a scalable web platform capable of handling high volumes of concurrent reservations.
- **Scout:** Rover at AGESCI Ragusa 2.

SPORT

- KTH volleyball team's libero. Amateur climber and passionate hiker!
